Teachable Machine
What is this?
This link hosts a machine learning model created using Teachable Machine, a tool that makes it easier for anyone – teachers, students, artists, makers of all kinds – to train machine learning models.
How does it work?
Machine learning models are trained on examples (e.g., images, sounds, poses) gathered by the creator. Their results depend on the data they've been trained on.
Want to use this model in your project?
See this link to learn how to use Teachable Machine models in your projects.
Report this model:
If you have concerns about this model, report it using this form.
This model:
teachablemachine.withgoogle.com/models/dkejPiQb6/
/model.json
The model architecture, used by TensorFlow.js library
/metadata.json
Contains the model metadata, for example class labels and version of library
/model.weights.bin
TensorFlow.js binary file containing the model weights
Preview this model live
